

Compassion Fatigue

Compassion fatigue is characterized by physical and emotional exhaustion and a profound decrease in the ability to empathize, and occurs as a result of helping those who are in need.

Symptoms of Compassion Fatigue include:

- Less ability to function
- More stress than usual
- Caregiver feels traumatized
- Working harder, getting less done
- Irritability, trouble sleeping
- Feeling bored
- More sickness, aches, and pains

Compassion fatigue is treatable and EAP counselors are available 24/7 to support you through it.
